

AUTOMATION AS A SERVICE

We build them, we run them, we answer for them.

Volkom builds the agents that take over an operation's manual work and keeps them running month after month. What they do stays visible in Mesh, its telemetry platform.

10 years in business	35+ people, all senior	20+ automations in production	2,500+ users on a portal in operation	~1 week saved per new agent	2 countries: U.S. and Argentina
-------------------------	---------------------------	----------------------------------	--	--------------------------------	------------------------------------

HOW THE SERVICE WORKS

WHAT GETS AUTOMATED

- **Systems with no API.** Bank portals, B2B portals and legacy applications. The logins, the downloads and the processing that follows all get automated.
- **APIs and files.** Reading invoices and forms, pulling out the data, moving it between systems that don't talk, generating reports.

MESH · THE PLATFORM

- **Execution telemetry.** Runs, timings and failures for every agent.
- **Business telemetry.** Volume processed and hours saved.
- **A single dashboard.** Every agent in one place, monitored the same way.
- **Proactive support.** Failures surface and get fixed on Volkom's side.

HOURS OF MANUAL WORK ELIMINATED PER MONTH

1,280 hours/month in total · Three processes automated at the same enterprise client. They predate Mesh; everything put to work now reports into it from its first run.

TWO PLATFORMS BUILT FROM SCRATCH

Billetera Activa
Government of San Luis

A private blockchain wallet with tokens backed 1:1 by the dollar, replacing a paper award that inflation kept eroding. Five months from concept to production.

Distribution portal
Beverage distributor

An ordering portal re-platformed in two stages on React and Enterprise Odoo, with no capability lost between versions.

ENGAGEMENT MODEL

- **Build.** A one-time fee per agent, based on the process.
- **Monthly maintenance.** Fixes, monitoring and Mesh included.
- **No minimum term.** There is no lock-in.
- **Billing.** USD from the U.S. or pesos from Argentina.

WHERE THE AGENTS RUN

Agents execute on the client's own infrastructure. Volkom does not host their systems or their data: it builds, maintains and monitors. Mesh stores only what the client chooses, and the code developed belongs to them.

ENGINEERING CAPABILITIES

Product Discovery · Business analysis · UX/UI	Engineering Frontend · Backend and APIs · Mobile · Architecture	Data and AI Data engineering · BI and analytics · AI / ML
Platform Cloud · DevOps and CI/CD · Observability	Quality and security QA and testing · Cybersecurity	Specialties ERP / Odoo · Blockchain · Integrations and legacy

STACK IN PRODUCTION: React · Next.js · TypeScript · Flutter · Node.js · Python · Django · FastAPI · PostgreSQL · MongoDB · BigQuery · AWS · GCP · Docker · Odoo · Hyperledger

LEADERSHIP

Mario Agüero
CEO AND FOUNDER
Entrepreneur with a proven track record scaling service and education companies.

Diego Varela
CHIEF AI OFFICER
Specialist in service delivery, consulting and operations.
